- **50 Employees**

My first website

First Hackathon at 15 years old

That's Sam Altman
President of Y Combinator

First Internship, 16 years old - SV

Traditional education is obsolete resulting in unemployment and technology companies lacking developers

Problem

Mismatch between education and market needs:

1. Automation
2. Market shift towards technology

Lack of Software Developers in tech companies:

1. High growth of tech sector
2. Not enough majoring in Technology
3. CS students lack practical skills

Tunisia as example

+300k Tunisian unemployed graduates

+15k developers need a year

+5k CS graduates a year

We provide **good Computer Science education in scale** for youth and empower them to become **world class Software Developers**

75% Placement rate

300 students got a job after attending GMC sessions

50 students became Freelancers

25 Created their startups

We developed a **network of partners** to help us **source, fund** and **recruit** our students

+3 Sourcing partners

+5 Funding partners

+50 Recruiting partners

Our solution mixes **On-site**, **On-line** and **Self** learning

On-site learning

- Completion
- Collaboration

Self learning

- Scalability
- Collaboration

On-line learning

- Personalized
- Data

We are community driven – Network effects

Hackathons

Workshops

Meetups

- Build community
- Identify the best
- Stay up-to-date

GMCx: High-school and university clubs

- 40 clubs
- +500 members

Many organizations trust what we do

100 most innovative startups in the Arab World by World Economic Forum

1st place in the MIT competition in Tunisia Bloommasters

Impact Fund Drosos funds training of 200 students per year in 5 years

US Embassy funded training of 50 students in Game Development

Hackerspaces (Sousse, Tunis, Sfax)
